

Install Consibio Cloud as an app

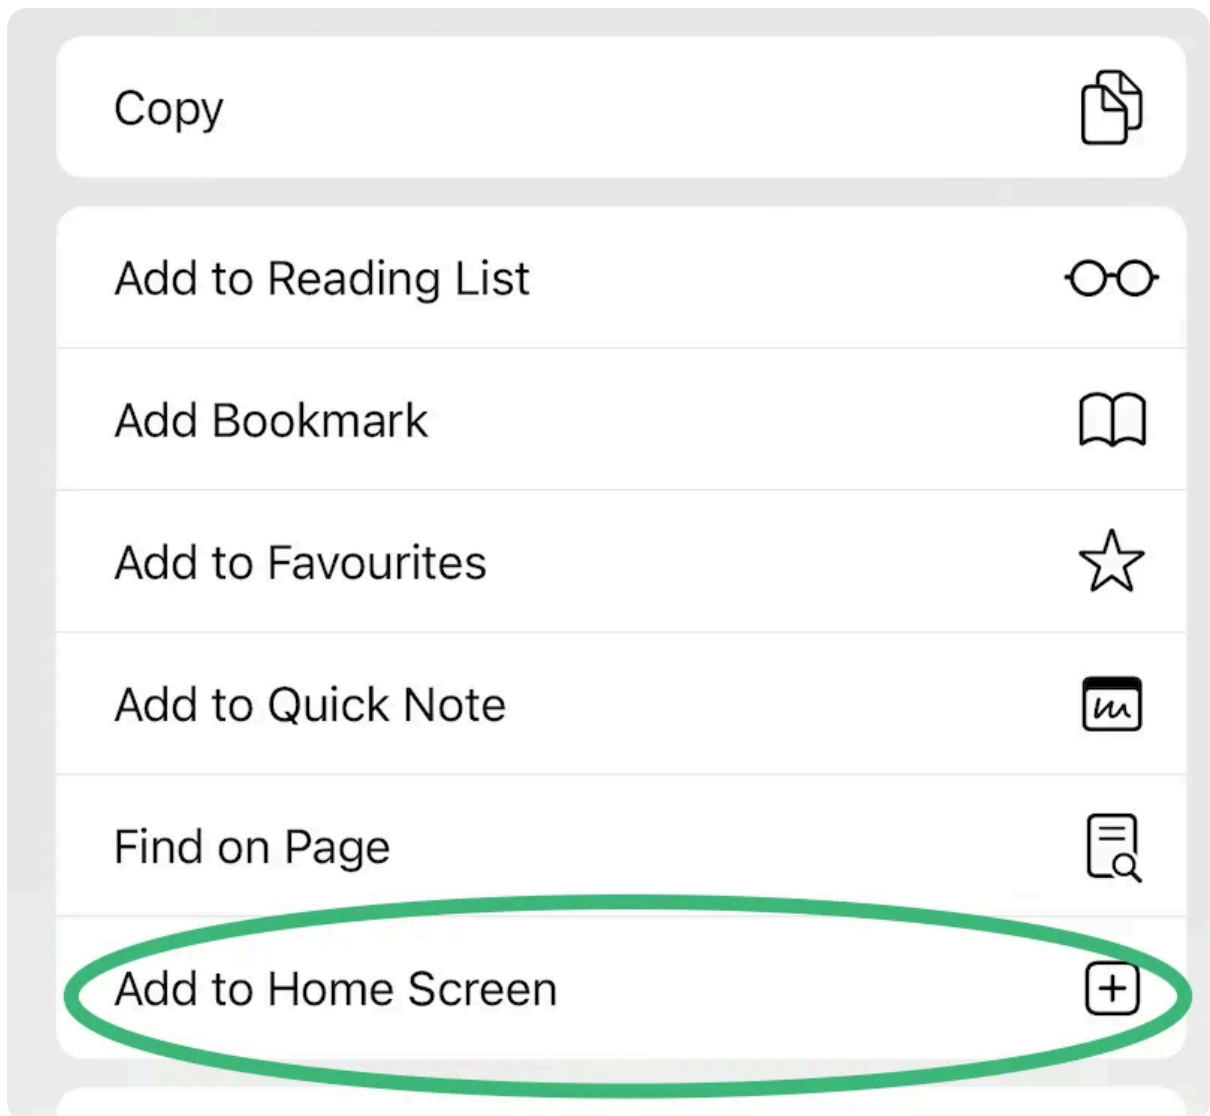

Consibio Cloud is a web app, but your phone's browser can install it to your home screen so it opens full-screen, without the browser's address bar — just like a normal app.

iOS (iPhone)

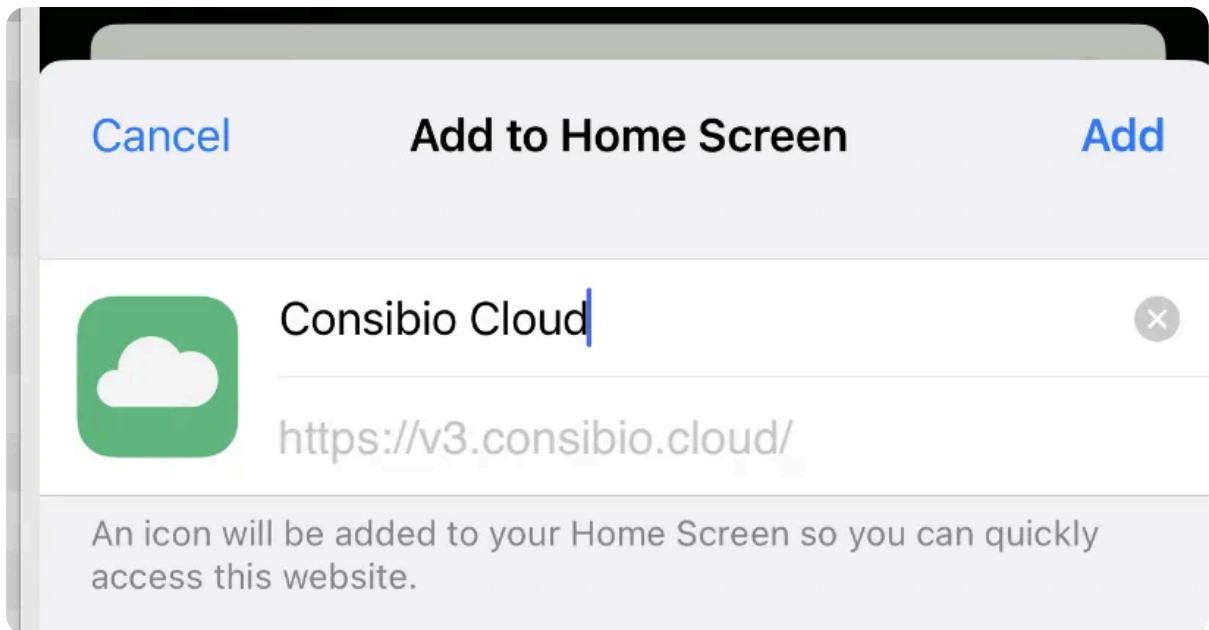

1. Open v3.consibio.cloud (<https://v3.consibio.cloud>) in **Safari**.
2. Tap the share icon in the toolbar.

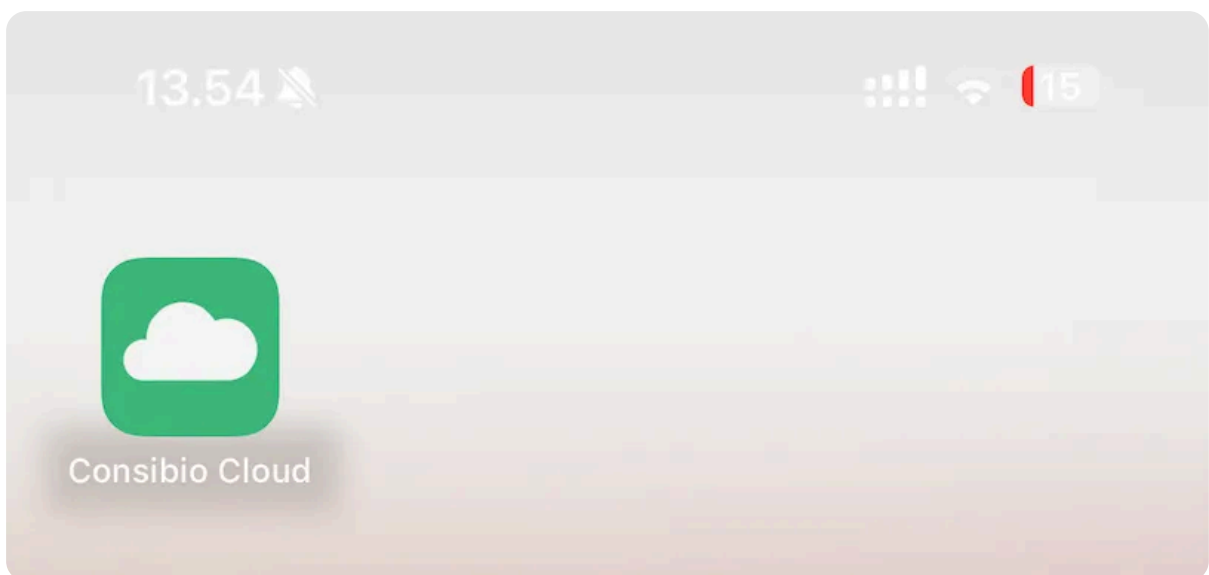

3. Tap **Add to Home Screen**.

4. Tap **Add**.

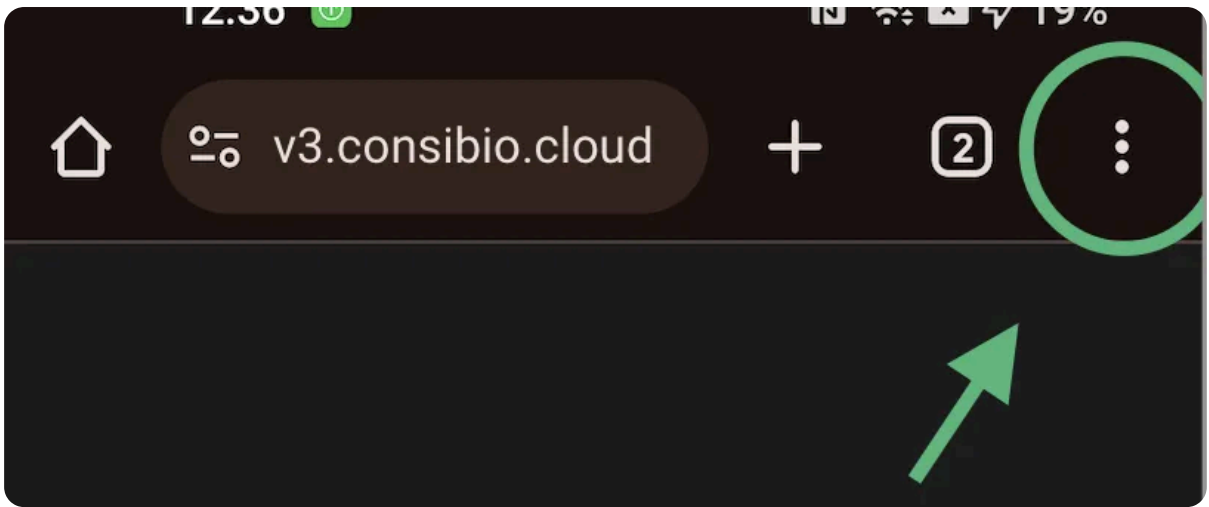

5. Consibio Cloud now appears on your home screen as an app icon.

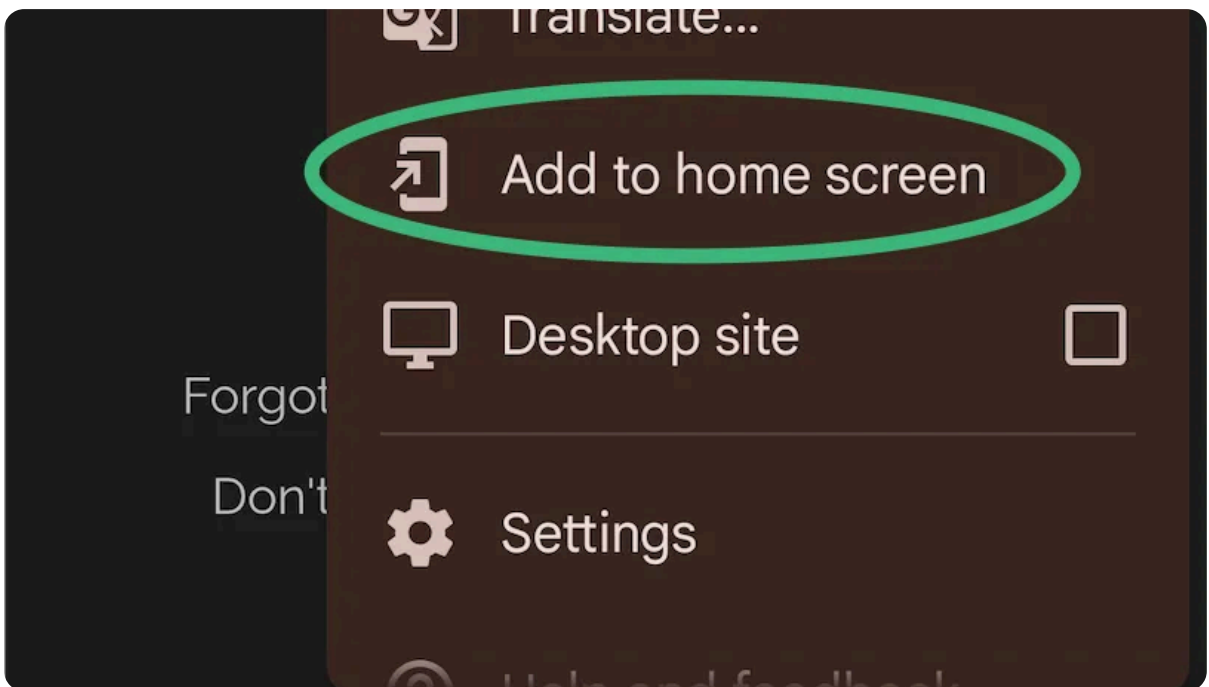

Android

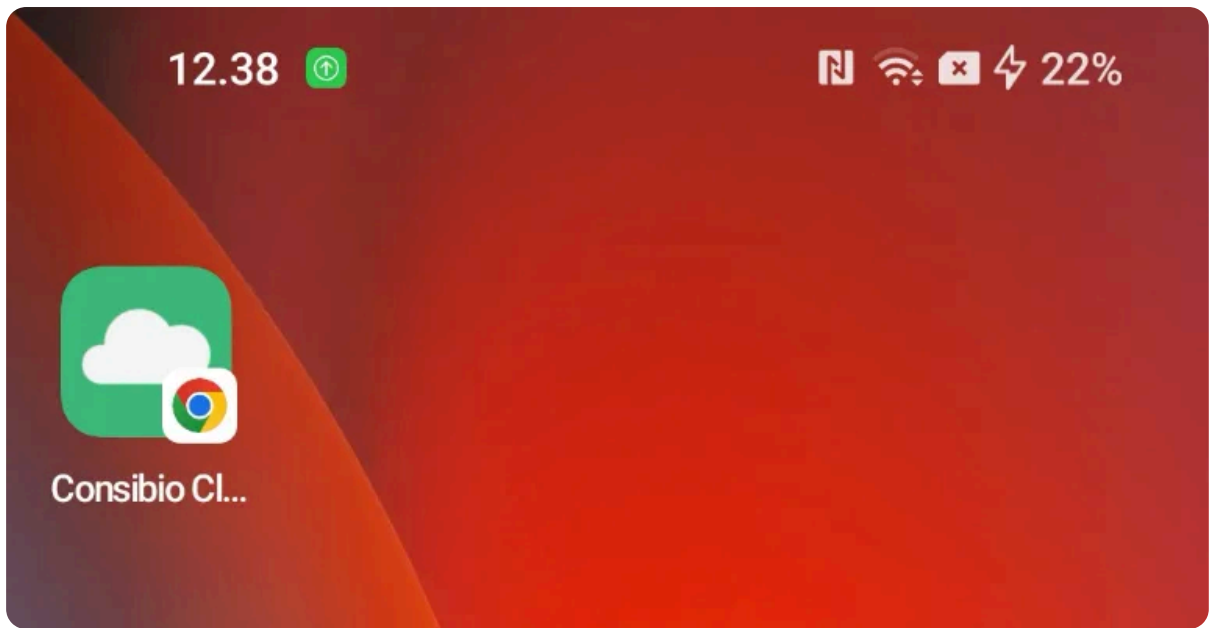

1. Open v3.consibio.cloud (<https://v3.consibio.cloud>) in **Chrome**.
2. Tap the menu (:) in the top-right corner and select **Add to Home screen**.

3. Confirm by tapping **Add**.

4. Consibio Cloud now appears on your home screen as an app icon.
